

JEHAD SOBOH

Egypt | jihadssobh@gmail.com | [LinkedIn Profile](#) | [GitHub Portfolio](#)

PROFESSIONAL SUMMARY

Medical Doctor (MBBCh) leveraging strong clinical reasoning and structured AI quality assurance to evaluate LLM response accuracy, instruction following, and prompt adherence. Experienced in comparative model analysis, factuality evaluation, hallucination detection, and medical fact-checking using annotation guidelines. Combines clinical expertise with practical QA experience to review Large Language Models for safety and alignment. Open to remote AI Evaluation, Medical AI SME, and Data Annotation opportunities.

CORE SKILLS

AI & Technical: Large Language Models (LLMs), AI Applications in Healthcare, Human-in-the-Loop (HITL) Workflows, RLHF Concepts (Foundational), Python (Foundational)

Evaluation & QA Keywords: AI Quality Assurance, LLM Evaluation, Comparative Model Analysis, Factuality Evaluation, Hallucination Detection, Safety Evaluation, Instruction Following, Annotation Guidelines

AI Tools: ChatGPT, Claude, Gemini, Microsoft Copilot (Prompting, Research, Content Analysis)

Medical Expertise: Clinical Reasoning, Medical Terminology, Evidence-Based Medicine, Clinical Research

PROJECTS & PORTFOLIOS

LLM Evaluation Portfolio • [GitHub Repository](#)

Featured Projects: English–Arabic Translation Evaluation (HITL), Arabic LLM Evaluation, Medical Prompt Engineering.

- Designed and documented 4+ structured LLM evaluation case studies analyzing response accuracy, hallucination detection, and instruction following.
- Compared ChatGPT, Claude, Gemini, and other LLMs using evidence-based evaluation rubrics and annotation guidelines.
- Developed Human-in-the-Loop (HITL) evaluation workflows and structured evaluation methods across Arabic, translation, medical, and prompt-engineering tasks.

PROFESSIONAL EXPERIENCE

Freelance Software QA Tester • Test IO

Jul 2026 – Present

- Performed functional and exploratory testing across web and mobile applications under detailed project guidelines.
- Identified, documented, and verified software defects with structured bug reports and clear reproduction steps.

Clinical Rotational Intern • Mansoura University Hospitals

Mar 2024 – Feb 2026

- Completed clinical rotations across major medical specialties.
- Applied evidence-based clinical reasoning and medical decision-making.
- Reviewed clinical information with high attention to accuracy and patient safety.
- Developed strong analytical and documentation skills in fast-paced healthcare environments.

EDUCATION

Bachelor of Medicine and Surgery (MBBCh)

Graduated: 2024

Mansoura University, Egypt

CERTIFICATIONS & MEDICAL LICENSES

- Clinical Research Course** – Negida Academy
- Start Writing Prompts like a Pro** – Google
- Design Prompts for Everyday Work Tasks** – Google
- AI Python** – DeepLearning.AI
- AI Applications in Medicine** – Great Learning
- Software Quality Assurance Training** – Test IO
- Palestinian & Egyptian Medical Licensing Examinations** – Passed

LANGUAGES

Arabic: Native | **English:** B1–B2
